EDUCATION

Terna Engineering College, Navi Mumbai
Bachelor of Engineering, Information Technology

2022 – 2026

TECHNICAL SKILLS

Languages:	Python, SQL, HTML, CSS
Frontend:	React, Next.js 14
Backend:	Node.js, Flask, REST APIs, Prisma ORM
Database:	PostgreSQL, Supabase
Blockchain:	Solidity, Smart Contracts, Ethers.js, Hardhat, Ethereum Testnets
Tools:	PowerBI, Microsoft Office, JWT, Clerk.js, Git, Docker, Postman, Firebase, Razorpay

Work Experience

Prettiflow (AI Infrastructure Startup) (AI Intern)	(Remote)	2026
- Evaluating LLM outputs and suggesting improvements. - Assisting with API testing and integration. - Researching AI models and comparing their performance.		

PROJECTS

Vyoma Bank – Hybrid Blockchain-Based Digital Banking System	2025
<i>Next.js 14, TypeScript, Node.js, Prisma, PostgreSQL, Solidity, Ethers.js, Hardhat</i>	
- Architected a hybrid Web2/Web3 banking platform combining traditional account workflows with immutable blockchain-backed auditability, bridging conventional finance and decentralized technology. - Engineered a privacy preserving KYC mechanism: identity data stored off chain while cryptographic hashes are permanently recorded on chain, ensuring compliance without exposing sensitive user data. - Built role-based loan approval workflows with on chain event logging, guaranteeing transaction transparency and non-repudiation across all stakeholder actions. - Developed secure REST APIs using Next.js and Prisma ORM with JWT based authentication and fine grained access control. - Integrated Ethers.js for controlled smart contract interaction and real time blockchain event verification.	

Credit Card Recommendation System	2024
<i>React, Flask, scikit-learn, XGBoost, PostgreSQL</i>	
- Designed and deployed an ML powered recommendation engine that matches users to optimal credit cards based on income profiles and spending behavior patterns. - Implemented XGBoost classification with encoded card type features and reward category optimization, achieving accurate multi class recommendations. - Built a full stack application with React frontend, Flask REST API, and PostgreSQL for persistent user and recommendation data storage.	

ACHIEVEMENTS

Tabla Visharad – Graduate Diploma :- *Gandharva Mahavidyalaya, Mumbai*
Foundation Course in Fine Arts :- *Directorate of Art, Maharashtra*
Managed Operations of Revive Fest :- *Lead a team for conducting Musical Events*
